

***The energies we are to create during this 8-8-8- New Time, with the Gaiadon Heart Multi-dimensional Time Activation shall continue to escalate!***

***The Creation of the Gaiadon Heart Vortex, in September this year, in Portal Land will build upon the energies created this 8-8-8, on August 8th, and hence those Gaiadon Masters who gather in Portland will be working with the Highest frequencies of Love to Create the New Gaiadon Heart Vortex of Love upon this beautiful Planet!***

***The Dream of Gaia is manifesting!***

Dear Ones of Light,

As we approach a significant phase in our spiritual elevation, and ascension process, we are at the point of passing through another important shift-point, a wonderful grid point, where we gather all our love energies to activate the 8-8-8 Portal once again, as all of humanity have indeed accessed this portal, and will join us in moving through the New Time Continuum, that will be opened for the whole planet beginning from 8th August 2006.

This will be an exciting 13 moon year till the 9-9-9!

As the Gaiadon Hearts, we have already anchored the 8-8-8 Christ Consciousness Frequencies, and activated this very same portal in advance, ahead of time, to bring in the 8th dimensional energies to the planet, and indeed we have activated the 8th Dimensional Heart of Mother Earth well before it was scheduled.

By activating the No-Time Zone, we created a null point that allowed all negative energies to be neutralized and also released the human race from the limitations of physical time.

We, as Time Masters have enjoyed and experienced Cosmic Time, as wereleased all the time locks and activated Cosmic Time.

The Completion of the No-Time Zone, coincided with the 7-7-7, where we once again downloaded and activated many galactic time key codes and began to explore Galactic Time. We learnt many secrets of time beyond this dimension, such as Parallel Time, Cosmic Time, Galactic Time, Inter-dimensional Time etc.

The 8-8-8 Portal signifies the activation of a New Time Portal, and through the portal, we activate a New Time Continuum.

This Continuum allows us to travel through many time realities, and receive the encodings of multi-dimensional time, and space. The study of Timetatronics is again overseen by Metatron, and we receive the understanding of higher time sciences.

There is a new science in the study of higher dimensional time that is known as meta-time.

Meta-time is fluid and light, and is the understanding of time, at very subtle frequencies. Not only is it not possible to imagine time in these frequencies as we do in linear time, but here time cannot be measured by numbers - rather by feeling, sound, colour and vibration. It is abstract and moving all the time.

To completely understand meta-time, we shall attend many higher universities of learning within other dimensions.

We shall now begin to receive higher initiations with the support of Ascended Masters, and through symbols and visions, we receive all the encodements that we need to receive in order to graduate from this study.

The New Time Portal Opens up the New Time Continuum.

As we enter, we totally open up your consciousness to the infinity that exists within our being.

Within cellular form, the time coding or track is determined by the magnetic field as it interpenetrates within the Mitochondria. The Higher Mind, through the programs of creation requires each time zone to be continually formed and transformed and restored, thus allowing entropic regions to unfold and fall away as an imperfect program or be renewed through an Omega Plus function. Higher creation initiates, through templates of energy, configurations which shape multiple energy spectrums and localized fields of mass which precede the shaping of a physical universe. Our universe is seeded with templates which contain the blueprints of gradual evolution through a sequence of biomechanical stages. We learn from this understanding, the basic codes to be used in the co-creation of new universes and life systems.

**Meta-time field of love :**

Our bodies are time streams that flow into invisible oceans of intelligence, through various time portals known as Meta-time fields of love, being constantly re-calibrated through our DNA.

**THE CERULEAN CRYSTAL**

In order to fully capture the information within the spiraling dimensions around you, Enoch gives us a new time seed cell, that is a 24 faceted crystal, holding the cerulean blue energy. The Cerulean Blue Crystal exists as an aetheric crystal within central chamber of all the Crystal Computer Complexes, the Temples of Learning that we have accessed. It is known as a Cerulean Crystal Time Intelligence Encoder. It filters information that is non-serving, and only downloads the higher light wisdom that we require for our ascension.

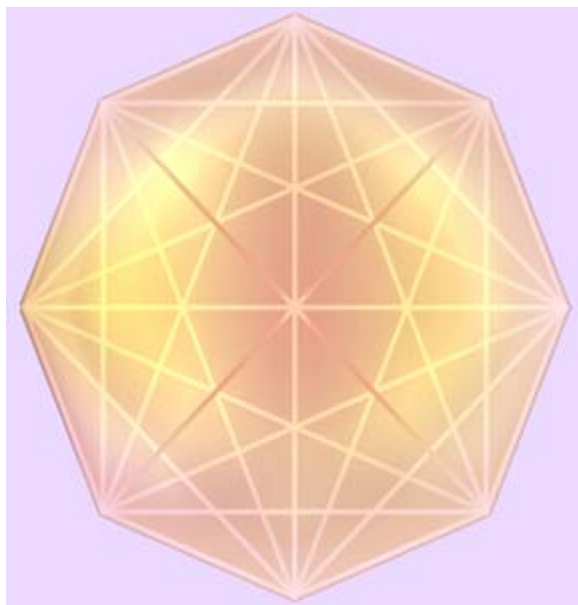

- Spiral thought-intention with breath:

*Activate Cerulean Crystal Time Intelligence Encoder (Inhale)  
Download Higher Light Wisdom (Exhale)*

**THE OCTAD :**

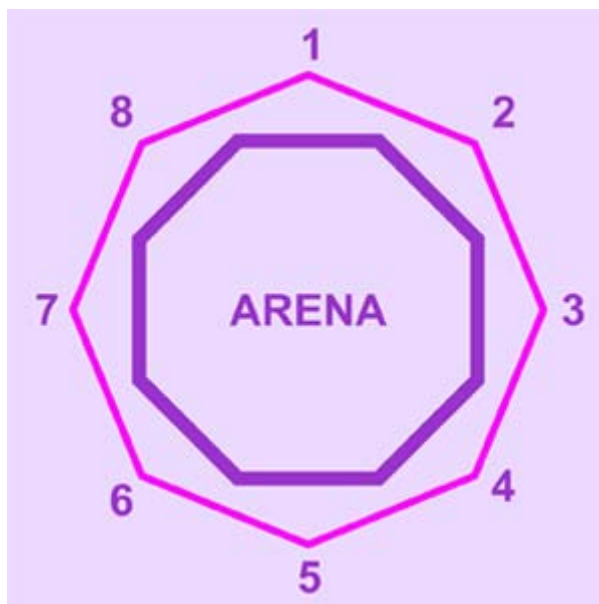

Enoch gives us the guidance to activate the octad, which holds the eight vortex pools of intelligences.

The symbol used to represent this system is derived from South-West Asia, where it is a common means of expressing a total order in which all things find their place. When all the first order connectivities are drawn, we have the total octad symbol.

### Total Octad Symbol

The common region of the two squares is called the Arena and is considered to represent the region within which the action of harmonization of conflicting demands takes place.

The octad affords a means for a total grasp of a situation.

We as divine time travelers along with our co-traveller souls, have a contract which is to accomplish Light Redemption, at a cellular level.

As we tune into the octad, it reveals to us, the light mathematical formula and codes that are being registered in the multi-dimensional time zones of this Earth, and they activate specific programs to redeem light which originally belongs to the Original Pure Sun, Atoma, but has been trapped in the atomic and genetic coding of realms with the spectrum of the Earth. You receive full understanding of Higher Light Physics needed to redeem trapped light within the Earth realms.

- Spiral thought-intention with breath:

*Activate 8-8-8 Octad Matrix (Inhale)*

*Download Higher Light Physics for Light Redemption (Exhale)*

From this present time frame we seek to connect with the multi-dimensional entry points within the octad and open up the portals for the light beings to enter for the purpose of the redemption of light of the planet.

***META-TIME FIELD OF LOVE:***

***MULTIPLE TIME REALITIES :***

Enoch states that as we work with the spherical time matrix, the new time dynamics would activate this meta-time field of love and it is essential to change the physical time dynamics into a meta-time dynamics.

We shall create new energetic galactic patterns that will influence the electro-magnetic wave form patterns of the planet, acting like multi-dimensional DNA, bring all different time realities into unity, with the single signal of our light language of love, so we can experience time in all its manifestations through our single eye, with the fourth vision, aumni-vision, within specific ultra-fields of consciousness.

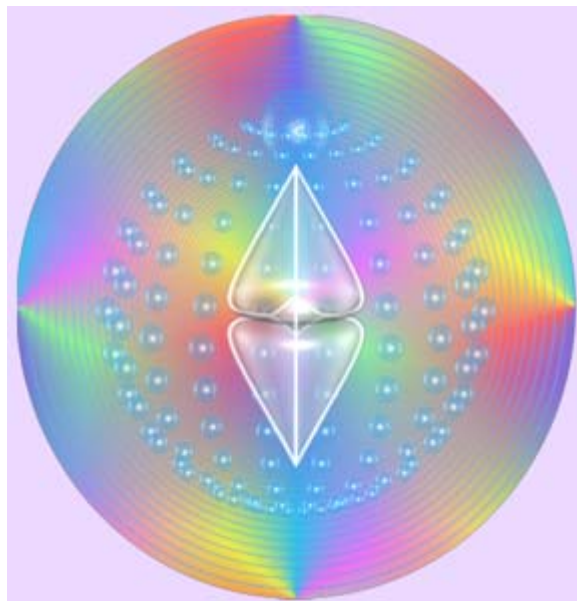

By zeroing in on the planetary real time dynamics, and adjusting and re-adjusting our focal vision, we are able to follow our course.

Without this continuous adjusting, and readjusting, and by simply tuning into the zero-point, we would be everywhere at once and consequently, also nowhere.

We have been assigned to re-activate a level of our time consciousness sphere that had been shut down, calibrating it to a more evolutionized frequency.

Hence the octad, opens up the 8-8-8 portal, and magnetizes to our consciousness, new sacred patterns that further open up our aumni-versal consciousness.

**MULTI-TIME TRACK MATRIX :**

Once more we travel through multi-tracks of time and we can experience the spherical opening of our heart-time matrix, letting all time realities revolve around us and through us, much like the many worlds revolving around the Central Sun.

When riding the time tracks, there is often a radiating influence along the meta-grid of time, creating a shower of Spirit overlays with the traveler's soul forming different experiences within the grid. We are also multi-dimensional time travelers, so we are continuously creating these realities from our multi-dimensional and aumni-versal soul reality.

We must now activate Multi-Time Tracks and Meta-Time Field of Love.

- Spiral thought-intention with breath:

*Activate Multi-Time Tracks (Inhale)*

*Activate Meta-Time Field of Love (Exhale)*

We allow our bodies to be absorbed into the force fields, allowing ourselves to integrate several lifetimes and move into our current incarnations. However, in experiencing multi-dimensionality, perspective is everything. We can still live those lives in-between, but from the relativity of our current embodiment. What is important is the Now. By merging the past / future, and drawing the whole experience into an inner plane heart experience within the Now, we always elevate our understanding of creation and co-creation.

We are now able to use the sacred geometric forms, to alter the dynamics of time and to fully embrace multi-dimensional time.

We are shielded everywhere by the divine love consciousness. We may observe from any one point along the continuum, the new time dynamics of our Earth Reality time frame.

After the shift through the New Time Continuum, we are well into the New Earth Star reality.

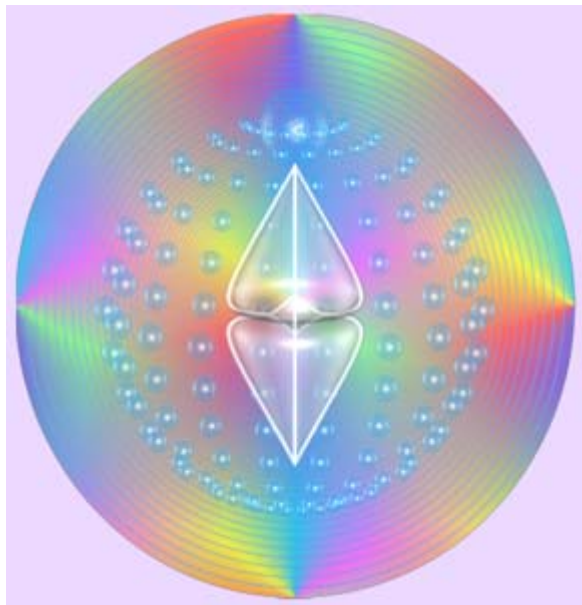

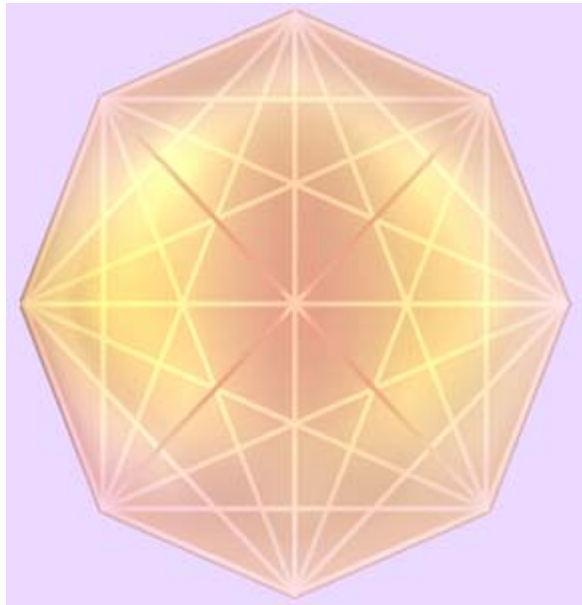

The old time dynamics pattern must not be traced into the new unless, it is altered. We must create the New Earth Star template. By 2012 the new time dynamic matrix will have completely been anchored, and sealed within the Time Chronicles of the New Earth Star.

8-8-8 - THE NOW TIME IS HERE!

#### **GAIADON HEART MULTI-DIMENSIONAL NOW-TIME ACTIVATION:**

As we are now ready to anchor the complete experience of Now-Time, with the 8-8-8 Consciousness Templates, we become the ones who shall truly experience Multi-dimensional time, as within the multi-verses, all time is now. We embrace the vast expanse of creation within our being and we truly cannot experience any limitation as we enjoy the unbearable lightness of our heart/soul as we dance with Spirit in the myriad manifestations of creation and new creation.
